

Spring 2026 – ECE 268 – Project Progress Report

May 13, 2026

Overview

Each project group must submit a short progress report summarizing the current status of the project and the plan moving forward toward the final presentation.

Report Requirements

The report must be at most **3 pages** and should clearly address the following:

- Work completed so far
 - Implementations
 - Experiments and evaluations
 - Preliminary results
- Challenges and issues encountered
 - Technical difficulties
 - Unexpected experimental behavior
 - Infrastructure or debugging issues
 - Scope changes or limitations
- Plans for the next two weeks leading up to the presentation
 - Remaining milestones
 - Planned experiments or evaluations
 - Writing and presentation preparation
 - Division of remaining work

Expectations

The purpose of the report is to provide the course staff with a concise overview of:

- The current state of the project
- The progress made relative to the original goals
- The feasibility and direction of the remaining work
- To provide feedback and assist groups with their projects

Submission

- Only **one submission per group** is required.
- Submit the report as a PDF on Gradescope.
- Ensure that all group members are properly added to the submission.
